The Authorized Treating Physician (ATP) is the key component in treating a workers' compensation patient. Understanding what the doctors "*think*" they can do and what the law permits is crucial to your claim.

This informative event will present cases illustrating reasonable expectations of the ATP and provide real-life examples of how to best facilitate claims. A robust Q&A session will allow attendees to highlight issues that adjusters face when working with the ATP. This program will offer two Georgia CE hours for adjusters, pending approval by the GA Department of Insurance.
