

WEBINAR

PETITIONS, PRESCRIPTIONS AND PROOF: MEDICAL TREATMENT IN WORKERS' COMPENSATION CLAIMS

THURSDAY • JANUARY 15 • 2026

1-2 P.M. EASTERN

When medical treatment has been accepted on a claim, issues often arise when the claimant wants a specific treatment authorized, but the employer and insurer do not think the treatment is reasonable, necessary or related to the work accident. Likewise, there are times when medical treatment has been authorized and scheduled but the claimant fails to comply for unknown or unreasonable excuses. The petition for medical treatment (PMT) set forth under Board Rule 205 is a tool which both sides of a claim can use to move medical treatment forward. In this webinar, the attorneys will provide a practical, step-by-step breakdown of how PMTs work under Georgia workers' compensation law and how employers, insurers and claims professionals can effectively use and respond to these petitions.
